

TRT CLINIC

How a New TRT Clinic Got Compliant in Under a Week — and Grew With Us

Under a week

To compliant

Schedule III

Handled right, day one

Added sites

Grew with us

1 THE CHALLENGE

A newly opened TRT clinic had no waste-disposal system in place — and testosterone (a Schedule III controlled substance) plus injection sharps meant they needed a compliant setup fast, without signing a new business into a rigid contract.

2 WHAT WE DID

We set them up in under a week with prepaid mail-back kits — sharps and controlled-substance disposal — no contract, no minimums, and Form 41 handled so the Schedule III side was right from day one.

3 THE RESULT

They were compliant within a week of opening — and have since grown, adding locations onto the same no-contract program.
