

PHARMACEUTICAL MANUFACTURER · REGIONAL

How a Pharmaceutical Manufacturer Replaced an Unreliable Provider — and Saved ~20–35%

On-time

Destruction + COD, every event

~20–35%

Lower cost

Registrant-to-registrant

DEA-compliant

1 THE CHALLENGE

A regional pharmaceutical manufacturer with a handful of sites depended on a destruction provider that had become unreliable — missed pickups and late paperwork — a serious problem when you're a DEA registrant accountable for every unit destroyed.

2 WHAT WE DID

As a DEA-registered destruction company, we took over their controlled-substance destruction registrant-to-registrant — witnessed, non-retrievable, with chain-of-custody and a Certificate of Destruction on every event, on a schedule they could count on.

3 THE RESULT

Destructions and documentation now land on time, every event, with no more missed pickups — and it came in roughly 20–35% below what their previous provider charged.
