

VETERINARY GROUP · SOUTHEAST

How a Southeast Veterinary Group Closed a Controlled-Substance Gap — and Cut Costs ~25%

~20–30%

Lower cost vs. hauler

Under a week

Switched every site over

Passed clean

Compliance audit

1 THE CHALLENGE

A multi-location Southeast veterinary group was managing controlled drugs — sedatives, ketamine, euthanasia solution — under a national hauler, but the way expired and wasted controls were documented left a gap heading into an audit. It was also costing more than it should.

2 WHAT WE DID

We switched every site onto prepaid mail-back kits with no contract — live in under a week — and stood up DEA-compliant, non-retrievable controlled-substance destruction with Form 41 and witnessed logs, alongside sharps and pharmaceutical waste.

3 THE RESULT

They came through their audit clean with a complete Certificate-of-Destruction trail — and cut disposal costs roughly 20–30% versus their old hauler, with no contract to stay locked into.
